CONTENTS

Introduction	5
1. Refinement of model description of POP fate in the environment	7
1.1. Sorption and degradation of particle-bound PAHs	7
1.2. Evaluation of direct emissions to soil for PCDD/Fs	10
1.3. Global-scale modelling of POP pollution	15
1.4. Concluding remarks	26
2. Mercury atmospheric chemistry	29
2.1. Model updates	29
2.2. Simulations program	31
2.3. Case 1: Waldhof station, 2009	32
2.4. Case 2: CARIBIC	42
2.5. Concluding remarks	48
3. Inverse modelling	49
3.1. Heavy metals (HMs)	50
3.2. Benzo[a]pyrene (B[a]P)	57
3.3. Concluding remarks	64
